WELCOME

To Old Friends and New,

We are excited to welcome you to Memory Ranches' 2021 Biennial Production Sale. We are very grateful that our biennial sale landed in 2021 and not 2020! This is our third year in Clover Valley, Nevada and we love it more and more each year. The beauty of the East Humboldt Mountains (known as the Little Alps of America at 11,000 feet elevation) in our back yard still gives us a thrill and are not taken for granted. We love our neighbors and the many people we've gotten to know here and consider them the salt of the earth kind of folks.

This is not only a great place to live, but also a great place to raise and train horses. The elevation combined with the rugged terrain develops the horses physically, and they learn to handle their feet in rocks and steep country. We have acquired several new stallions to continue to improve our genetics and are excited to show you the results. We continue to make improvements to the ranch. We have reseeded rangeland, beat off more sagebrush, built sucker rod fences, and added to the arena.

True and his wife, Andrea, and their five children live in Idaho. True has a law practice, competes in 3-gun competitions, and is also the editor for the online magazine, *GunsAmerica*. We depend on True for all our sale day technical support.

Harmony and her husband, Benjamin, are farming in Reese River, Nevada. Each year they add new pivots and turn sage ground into productive alfalfa fields. We were all thrilled they had a baby boy, Truman Noble, last July. Their two little ones keep Harmony busy, but she still takes the time to build our ads and come over to take the horse pictures.

Montica and her husband, Zack, and their three children live in Merced, California where he manages an almond processing plant. A year ago they purchased 60 acres of almonds that they are transitioning to organic. In spite of being a busy mother and "farmer" Montica's our firsthand advisor for anything that takes an artist's eye.

Luke and his wife, Amber, and their four children are here on the ranch with us in Nevada. Their children have come to the age where they are making great little hands whether moving cattle or working the chutes. Luke is an integral part of our entire operation but specifically oversees the horse program.

Lincoln and his wife, Kelsei, have added a baby girl to their family since the last sale and now have five children. They are very busy parents! They live in Star, Idaho on an eleven acre farm where their children are learning to work feeding bum lambs and caring for other animals.

Merrily is here on the ranch, managing the website, the social media, taking pictures and managing the sale of our fillies. Her menagerie of animals continues to grow with two miniature Zebus, five Jersey milk cows, three Rhodesian Ridgebacks, beef cows, horses and even two surviving geese.

Clancy is here and we are so grateful! He is our full time horse trainer and puts in long days. He is kind of the glue that holds everything together when Monty and Luke are gone, capable of pitching in wherever he's needed. Since our last sale he has become certified in equine adjusting.

All the family's support and help on sale day is so appreciated! We look forward to seeing you and talking to you on June 26th. Don't hesitate to come introduce yourself and ask questions. Hopefully we have a horse that fits your personality and your needs. Please consider making your next horse a Memory.

Thank you!

Monty and Merry Pearce

Our New Location

CLOVER VALLEY NEVADA

It seems fitting that while seeking a larger ranch for our cattle and horse operation we found one where the history runs as deep as it does in our own family.

These photos, shared by our dear neighbor, Joanne Dalton, depict the ranch decades ago. We are blessed to be surrounded by wonderful neighbors who share our love of ranching. We are grateful to preserve this beautiful piece of ground and be a part of the rich ranching heritage of Clover Valley.

Rio Grande is an exceptional band that has its roots deep in traditional country music. They're made up of seasoned musicians, Tom & Charli Jones on vocals, guitars, and keyboards, with Jim Farnsworth on pedal steel

and guitars. Their experience as studio musicians makes it a special treat for folks when they play as a live band. They perform some of the best country music ever produced and it gets them invited back wherever they go.

DON'T JUST TAKE OUR WORD...

"We have been so impressed with Charlie. My dad purchased him at your 2019 sale. As soon as we got him home, he continued to progress in the heading and heeling. We started him in both the barrels and the poles that summer and began hauling him to exhibition in the fall. By the summer of 2020, he was running at jackpots and Little Britches Rodeos in the barrels, poles, goats, trail course, heading and heeling. In 2020, as just a 5 year old, he was our daughter's heel horse for the National Little Britches Finals in Guthrie, OK. He is a money winner in every event and from World Series Ropings to Little Britches Rodeos to Junior High and High School Rodeos. Charlie is so easy going, nothing bothers him. He stays quiet, is an easy mover and is fast! He will do any outside chore you ask of him, has great feet, and a big heart. Horses like him are hard to find! Thanks for the opportunity to ride one like him."

— Jason Grubb, South Dakota

"We bought Pecos in the 2019 sale as a 5 year old. We have been very impressed with his disposition and how mature he is to handle every situation we put him in. Our 8 year old can ride him at junior rodeos and he melts down and goes to the speed she wants. Then you can step on him at a World Series roping and he has the speed and agility to win on. We are very impressed as he will be going to the World Series roping in Vegas as a 6 year old."

— Justin and Salli McDermott, Nevada

"I'm a cattleman in Mexico and ranching is what I do for a living. Horses are a big part of my life. Over the years, I have had so many horses in my life. I love to rope and train my own horses. I bought Wishbone from Memory Ranches 2019 sale and he is very special. He does everything the right way. I really like their horse program. They breed what I like and it took me several years to find them. I have bought ten horses now from them and all have been very nice mounts. Thank you for producing these athletes. Wishbone is my forever horse."

— Luis Prieto, Mexico

"I was born in love with horses and got my very own when I was 14. Tuffy was bred by Memory Ranches and has the confirmation and the looks. For the first couple years I rode recreationally, but after 2 years I taught her the barrel pattern and started to barrel race and rodeo. Within a year, I had placed top of the 2D, and 6 months later I was placing in the 1D and pulling checks. Tuffy wraps the barrels so tight and hardly ever knocks, I never would have thought her little legs could run that fast. She is so automatic and makes barrel racing easy, since most times, I forget how to ride when I reach the alley! At the jackpots and rodeos I go to, I always seem to get compliments on Tuffy's confirmation and looks."

— Kyrsten French, Canada

SEE WHAT THESE BUYERS SAY

"The buckskin mare on the hazing side is 6 this year. It was her first rodeo competing and she was absolutely perfect. She's a daughter of Driftwood Stetson that heads, heels, breakaways, runs barrels, and hazes dogging steers. In her spare time, she's a lesson horse for beginners roping, on the barrels and poles and tying goats. Not to mention, this pretty mare is a rock solid ranch horse. She has an extremely trainable mind with a kind, willing disposition. The bay gelding on the other side is full of attitude and athleticism. He has made the Columbia River circuit finals in the tie down and he's my backup barrel horse but his true calling is a bad cat of a doggin horse. He's not an everyone horse....he's a one in a million. The beauty of the Driftwood bloodlines is what these two horses embody. I have a multitude of horses with these lines in my barn and will continue to add more. Thank you to Memory Ranches for raising some great ones."

— **Lacey Triplett, Oregon**

"We purchased Woody "LMP Gents 402" out of the Memory Ranch Sale in 2019. He has it all! The looks, the brain, and some super athleticism! Anybody could ride Woody, he's super gentle! This guy is as honest as the day is long. He knows what he is there to do when you take him to a roping. Every time you back into that box, you have the opportunity to win with him underneath. He has won a saddle and placed at several jackpots. He also has won at the World Series Roping's and qualified for finals. He was said to be the one that will get your number bumped and did just that!"

— **Kurt Campbell, Utah**

"LMP Spicy Ninja is such a great mare. I purchased her for my daughter as a 5 year old. She is such a great horse...willing, smart, athletic, great minded, well mannered and absolutely gorgeous. Their first year out they placed 2nd in the Youth 3D at Keystone Barrel Classic. As a first time horse owner I couldn't have had better luck finding a horse. I can't wait to see where this duo go together and will definitely go back when we are ready to purchase a second horse."

— **Jackie Thomas & Ryleigh Johnson**

"Smoke has been a solid horse through and through since purchasing him as a 3-year-old in the 2009 sale. He is 15 this year and has not changed one bit. He has roped with my dad and runs barrels and poles with me. He is extremely quick footed and responsive. We are so lucky to own and ride such a great horse!"

— **Rachel Weston, Pennsylvania**

DIVERSIFIED RANCHING

When Merry and I were married 49 years ago we were a couple of young kids with big dreams and no money. We dreamed of owning our own cattle and horse ranch someday, but in college they taught us that with the economy the way it was, unless you inherited it, you could never own a ranch. We discovered that the American dream can still be realized. Instead of furniture and everything our folks had, we bought one cow at a time until we built our registered herd.

We now market 150 black and red Angus yearling bulls through private treaty each year. This is the 47th year that we have artificially inseminated our cow herd. We have selected for calving ease, growth, carcass, good udders, efficiency, and thus have achieved problem free cattle. We have avoided doing single trait selection and focused on balance.

Moving to Nevada has allowed us to start Pulmonary Artery Pressure (PAP) testing our bulls. The PAP test helps determine which animals are most at risk for brisket disease and detects the early stages of the disease. The results are only valid if cattle are tested at or above 5,500 feet.

The #1 and #2 problems in feedlots are respiratory issues. Brisket disease is also being seen at as low as 3,000 feet elevation. Research is showing that PAP tested sires help eliminate these respiratory problems in their progeny.

Here in Nevada, our feedlot is at 6,000 feet elevation. By offering PAP tested bulls we are providing the genetics that the feedlots will eventually pay a premium for as it is truly related to their bottom line.

THE DRIFTWOOD HERITAGE

By Phil Livingston

Author of The Driftwood Legacy, a Western Horseman "Legends Series" author and Driftwood breeder. Pictures used from The Driftwood Legacy with permission.

For well over half a century, the name "Driftwood" in a using horse's pedigree has defined outstanding performance. On the ranch, in the show ring and in the rodeo arena ...especially the rodeo arena, the Driftwoods have set the standard by which other contest mounts are measured. An outstanding rope horse himself, Driftwood passed on his winning ability to such respected greats as Cowboy - Asbury Schell; Poker Chip Peake - Dale Smith; Mac McCue (Old Blue) - Oscar Walls, Gilbert & Buck Nichols; Drifty - Eddie Schell, Tommy Rhodes; Cherokee Jake - Asbury Schell; Speedywood - Dale Smith; Speedy Peake - Max Schott; Wooden Nugget - B.J. Pierce; Cowboy C - Joe Bassett, George & Leck Cline; Shady - Dale Smith; and Driftwood Ike - Roy Wales, Chuck Shepherd and John Kieckhefer.

In recent years, the list continues with Bar - Tom Ferguson; Wildfire - Reg Camarillo; Ike - Clay O'Brien Cooper; Six Pac - Julio Moreno; "Bozo" - Kristie Peterson; Goldenwood Jaye - Wade Wheatley; Aliso Oso Rubio (Ruby) - Jim Wheatley; Snip - George Richards; and Driftwood Mas - Jim Wheatley.

Over 40 ProRodeo World Championships have been won on these dependable campaigners ...and more will come as ropers and barrel racers continue to cinch their saddles on the Driftwoods.

A professional roper himself, Mel Potter knows first hand the willing mind, quick speed, athletic ability, in-born cow sense and sturdy conformation that it takes for a horse to "go down the road." He has dedicated himself to raising horses that you can win on. Well over \$1 million ProRodeo dollars have been won on horses carrying the Potter brand, as well as countless purses pocketed at other levels.

OUR CREW

JACE MITCHELL is from Veyo, UT. He has been with us since the spring of 2017. He has fast become an integral part of the horse program and a good friend. He bounces back and forth from summering here to wintering there, but like a lucky coin always shows back up when roping starts. Jace ropes here at the ranch on youngsters all week then loads up the veterans and competes in jackpots and rodeos all over the west. Few people ever get as talented with a rope and a young horse as this cowboy. We are happy to have Jace, Sierra, and little Swade here at the ranch.

LEVI ESTERHOLDT comes to us from Ontario, OR. He showed up at the ranch a year ago past April. He was a college graduate and wanted to have hands-on ranch experience. He got it! What we did to Levi would have killed a lesser man. He is the colt starter and fastest learner we have ever come across. He is a hard worker and a man of few words. He doesn't speak much in English, but has really learned to speak horse. We are lucky to have Levi be a part of the crew.

RYAN HAYS is from Unity, OR. He started training horses for us here last August. Ryan has cowboied on ranches all over the west, but most recently at the White Horse Ranch in Oregon where he managed the outfit and got it operational. He has always wanted to team rope so we are just keeping his nose above water. He has done a good job seasoning these young horses and getting them exposed to all that ranching has to offer.

STETSON CURTIS hails from Ten Sleep, WY. He comes from a ranching family there, and has lots of overall experience on a ranch. He is a hunting fanatic and a gun junky. Stetson guides hunts in the fall in Eastern Idaho. He got here this spring to help Levi get through all the three-year-olds that will be in the sale. He came saying he didn't know much but being humble is a good characteristic to have. He says he is looking for a wife so he is here for a good time, but not a long time.

WYATT DELANO calls Mesquite, NV home. Wyatt was given a couple month furlough from his fencing contractor job to come rope every day. What a job! He has stepped up and done a good job riding and roping on young horses. He has mixed feelings about being here, because he is going to get his number bumped. He has won money almost every weekend since his new gig requires him to rope every day.

OUR GELDINGS

Here is a blanket statement about all the geldings because it would be redundant to have it in their individual write-ups.

These horses have all been raised on the mountain and they are phenomenal to ride outside. They are sure-footed and aware of their surroundings. These horses have been raised on chelated minerals that are specific to this regional area's needs.

The five-year-old geldings have branded a lot of calves and have processed quite a few cows. They broke in a new set of steers this spring. They all have a little more to grow and quite a bit of mass to put on.

Some of the four-year-old geldings have branded calves this spring. They are started heading and heeling and have roped the Smarty. They have their first set of shoes on. Most of our horses will grow until they are six years old.

The three-year-olds have roped the lead steer, tracked and roped the Smarty, and a few have branded and roped cattle outside. They have been ridden outside on the ranch a lot. They have been climbing the mountain and dodging sagebrush and rocks from the time they left the round corral. They will have had 40 to 60 rides this spring. If you have any questions about any of the horses in this sale's offering don't hesitate to ask.

HORSEMANSHIP 101

Over the years we have learned that for a horse to be able to perform at their best, they need some basic maintenance and owner awareness. We have chosen four areas to highlight that we have seen to be the most commonly misunderstood and ignored by horse owners; feet, body alignment, saddle fit, and teeth. We feel that understanding these fundamental principles has greatly improved our horsemanship. What we have compiled below is not an exhaustive list and we would encourage all horse owners to continue to expand their own understanding in these areas.

FEET

Let's start with the foundation of the horse; its hooves. There have been different ideas over the years that have come and gone like fads as to how horses should be shod. Every horse is unique and needs to be shod to its appropriate angle. What we see too often is the lack of uniformity among the four hooves that belong to the same horse or the unevenness of a hoof from one side to the other. One bad shoe job can cause your horse to become sore and misbehave. Just like a crooked foundation affects a building, an uneven shoe job affects your horse. The heels should be even and the strata of the hoof should be the same angle as the slope of the shoulder and the centerline of the pastern. If too much toe is left it can cause horses to stumble. If they are too stood up (long heels

and short toes) they are going to break over too fast and be choppy in their movements. A balanced foot helps a horse to have balanced movements.

BODY ALIGNMENT

Have you ever done something that left you in pain and in need of a chiropractor? Well, your horse is no different. In fact, they are beasts of burden and with that title it's not uncommon for their bodies to become misaligned. When a horse becomes misaligned it will transfer weight to ease the discomfort. Your horse carries 60% of its body weight on the front end and 40% in the rear. It is our job to keep our

16 Memory Ranches Quarter Horse Production Sale

horses balanced. For example, if your horse is only ever exercised in one lead then it typically results in the muscles being stronger on that side of their body and can cause misalignment in the pelvis. When a horse's pelvis is sore it will transfer weight forward and the front end of the horse will then carry more than it should. Which then causes front end soreness and the problem continues to expound. Fun fact; a misaligned pelvis can lead to sore stifles and hocks, problems with leads, won't pull hard, phantom lameness, and oftentimes a bad attitude. Between

HORSEMANSHIP 101

each vertebra there are nerves that come out and these nerves feed into specific areas. When the vertebrae are misaligned those nerves are restricted and often will secrete lactic acid; the same acid that makes your muscles sore when you've overused them. Many of the nerves coming out of the withers end in nerve clusters in the cinching area. So when the withers are misaligned not only do they hurt in their back, but they'll hurt in the girth. Many horses that are misaligned in this way will become broncy as a result of the pain or may just act cold backed. Neck misalignment can also be a reason for horses being hard faced, stiff from side to side, and difficult to bridle or unbridle. The causes of misalignments can range from slips, falls, bad fitting saddles, loose cinches, taking a hard jerk, poor farrier work, heavy pulling, cast in a fence, or even roughhousing. Proper stretching and conditioning of a horse before being put to serious use can help prevent many problems but periodic checkups with a chiropractor can help keep horses working at their best.

SADDLE FIT

Just because your saddle was expensive doesn't mean it will fit your horse well. Every horse's back is unique. The likelihood of your family heirloom saddle fitting horses of the modern era are slim. For example, if you ride a horse with a high wither in a wide gullet saddle, the saddle will sit on the top of the wither which will then cause nerve damage and sores. On the other hand, if your saddle is too narrow for your horse's back then it condenses the weight to pressure points on both sides of the wither causing classic saddle sores. Even distribution of the weight is what we are trying to achieve. A properly fitted saddle should

sweat your horse's back all over. Having dry spots on either side of the wither is not ideal but the larger the dry spot, the better. Small dry spots indicate a lot of pressure on a small area. The worst sign of a poor fitting saddle is when the hair is roughed. If you don't ride for long and make your horse sweat, then having dry spots with smooth hair is probably not problematic. Quality saddle pads can help in the fitting process. Too much pad is just as bad as too little. Now why is this so important? An improperly fitting saddle can cause your horse's back to become sore and eventually lead to misalignment in the vertebrae. The misalignment can then cause pain/inflammation and result in undesirable behavior in your horse.

TEETH

If you own a car, you change the oil regularly. Your horse needs their teeth done in the same fashion. Equine dentistry has been a thing for millennia. So, nobody has the excuse that it is a new thing. If your horse's mouth is cared for it will stay in

better body condition, be less likely to colic, and will be softer in the bridle. I was recently told by an equine dentist that there are dental tools that we are just now figuring out how to build and use that the old timers used centuries ago. Not all dentists are created equal so do your homework and find a good one.

REFERENCE STALLIONS

DRIFTWOOD STETSON | 2001 DUN STALLION

Driftwood Stetson is an outstanding sire and performer. His get are uniform, athletic, kind and very smart. His foals all move like him. His line bred pedigree increases genetic predictability. We are excited to offer you both geldings and foals and let you ride a "Stetson"! The first time Stetson was ever shown, he won! He beat the National Champion buckskin mare at reining. He has since earned his ROM and quickly qualified for the AQHA World Show in heeling. He was just a few points away from qualifying on the head end, but he had to get back and sire some foals. He has shown in heading, heeling, halter, reining, sorting, and barrel racing. He has 53.5 AQHA points and 6 ABHA points.

LMP GENERAL IKE | 2013 RED ROAN STALLION

From the time General was born we knew that he was something special. He kept our hopes up when as a two-year-old, he broke out and rode like a dream. In 2019 he showed us that our belief in him wasn't misplaced when he won \$58k in Las Vegas at the Finally. He scores, runs hard, and handles cattle so well with his powerful athletic move. He has continued to progress and win in the arena as well as the pasture. His first set of geldings sell in 2021. They are good-looking, balanced, and have the same kind of class that makes General a favorite.

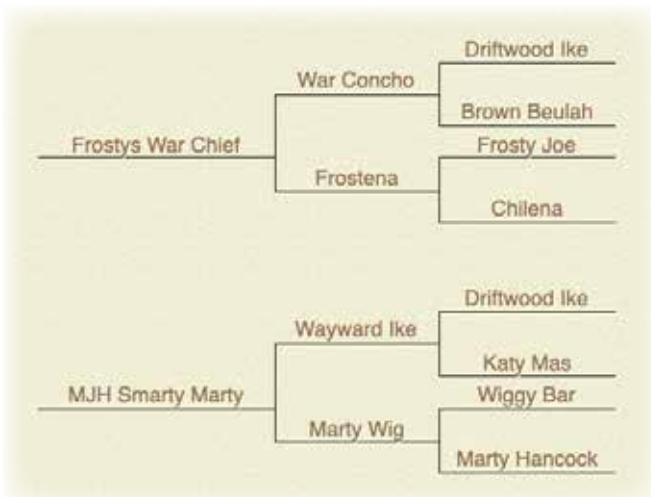

REFERENCE STALLIONS

DRIFTWOODS CLASSY TY | 1997 RED DUN STALLION

We did not hesitate when we were given the opportunity to get Classy in 2016. Being a double-bred grandson of War Concho made it a “no brainer” decision. Classy was severely crippled and starved as a youngster. He was rescued by a good friend and that is how we got him. If you ever saw his crippled and small physic you might have wondered what he was doing here, but after you ride one of his colts, you’ll know. His foals are good-minded, athletic, and well-built. We are incredibly happy with how they ride and their willingness to please.

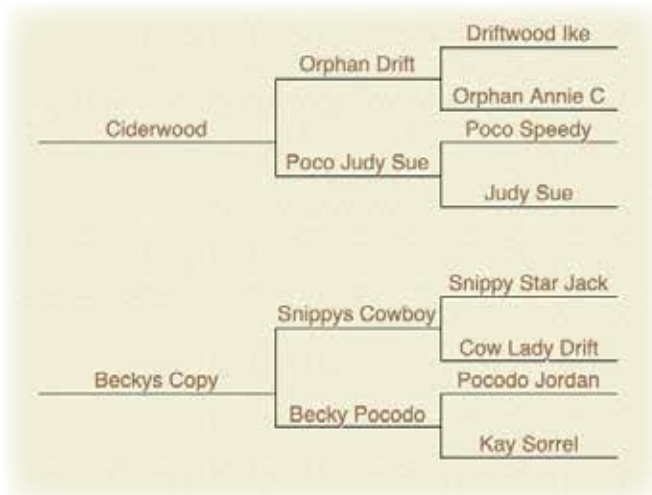

WC DRIFTIN TREVETTE | 2012 BLACK STALLION

Trevette is by the legendary Dakota Drift who was an AQHA 5 event show horse and AQHA 4x World Show Qualifier in calf roping (2x), heading, and reining. He is out of a top producing daughter of the immortal, Sak Em San, who has had many performers at the NFR. Trevette is wonderful to handle and be around, very athletic, and rides good. He stands 15.2 and weighs 1250. His colts are smart with willing and kind dispositions.

REFERENCE STALLIONS

BLAKEWOOD | 1996 DUN STALLION

Blakewood is sired by Ciderwood who many believed was Orphan Drift's fastest son. Ciderwood has sired a lot of speed. Blakewood's dam is a Snippy Cowboy daughter. Snippy Cowboy is out of Orphan Drift's greatest producing daughter. She produced four AQHA champions and one lacked 2 points to make the fifth. Blakewood throws plenty of size and tons of talent. His colts are incredibly athletic and making phenomenal rope horses. He was a very kind horse and easy to get along with.

PETE WILLIAMS LEO | 2003 GREY STALLION

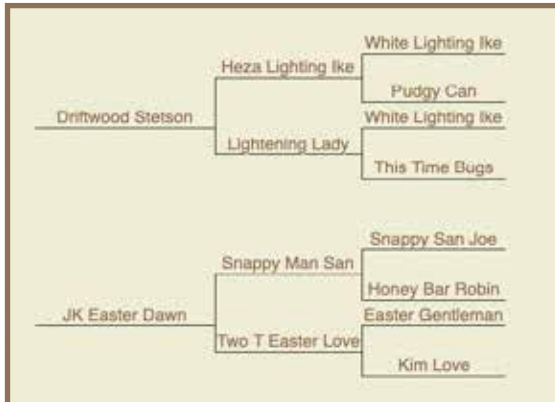

After losing this horse's sire we went looking for a replacement. We broke Pete to lead at 9 years old. We bred four mares to him and then started riding him. We were impressed by how he progressed and trained. He is very talented and has a good mind. When used as an outcross on Driftwood mares, the get are very breedy and consistent. He is the highest percentage Joe Reed II horse in the world at 46%.
